**AANS/CNS Joint Cerebrovascular Section
ANNUAL MEETING**

Programming in conjunction with SNIS

FEBRUARY 4-5, 2019

**Sheraton Waikiki Hotel
Honolulu, Hawaii**

Dear Colleague,

Greetings!

In advance of the International Stroke Conference in Honolulu, HI, the AANS/CNS Joint Cerebrovascular Section Annual Meeting continues its consistent commitment to excellence in the neurosciences and patient care, and growing collaborations in cerebrovascular treatment.

To that end, this year's two-day meeting will provide outstanding programming across a wide range of topics. Headlining the educational tracks are session blocks dedicated to cerebrovascular surgery around the world, flow diversion, vascular malformations and stroke system care. On Monday morning, just prior to the start of the meeting, we are pleased to collaborate with the World Federation of Neurosurgical Societies and host the WFNS Symposium in conjunction with the Joint Cerebrovascular Section. On Monday evening, you are invited to join us for a special ICH Dinner Symposium. There is no charge for either of these special sessions but advance registration is required.

In addition to scientific sessions, specific meeting highlights include the popular annual Luessenhop Lecture, this year given by Dr. Nobuyuki Sakai as well as the Ralph G. Dacey, Jr. Medal for Outstanding Cerebrovascular Research, this year given by Dr. Sander Connolly. Beyond featured sessions, attendees will have plenty of opportunities to interact with industry through several sponsored symposia, as well as in the Exhibit Hall. And, just to ensure a little respite from such an ambitious agenda, the program committee has planned the Taste of Hawaii reception with a myriad of indulgences for your enjoyment.

As the neuroscience field continues to evolve in ways that significantly impact medicine as well as patient care, it is more important than ever that we nurture our opportunities for partnership and collaboration. Through our collective clinical and institutional knowledge, as well as our mutual commitment to and passion for advancement of treatments that can revolutionize the quality of cerebrovascular care, we are endowed with a great responsibility. We trust this meeting will provide opportunities to glean more insights and create new intersections of thought that will further inspire us to carry out our respective missions, and meet our full potential as difference-makers in the neurosciences.

See you in Honolulu!

Sincerely,

Stavropoula Tjounakaris, MD
CV Section Program Chair

Mark Bain, MD

Evening Activity Taste of Hawaii Reception

You won't want to miss this culinary experience born of a true Hawaiian tradition. In 1991, 12 Hawaii chefs established Hawaii Regional Cuisine, a culinary movement that inventively blends Hawaii's diverse, ethnic flavors with the cuisine of the world.

One of the core tenets of the movement is to take advantage of the freshest island ingredients, including: cattle raised on the island's upland pastures, fruits and vegetables grown from volcanic soil, and fish from one of the best managed fisheries in the Pacific. The result is mouth-watering delights featuring some of the freshest locally-grown foods, fish and beef, all with a distinctive Hawaiian flavor. From Waimanalo greens to Kahuku corn, you'll have the opportunity to enjoy the very best of the islands. Stop by the reception and be sure to indulge before heading out to dinner.
